Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 24 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per the most recent interpretation of the Interim Guidelines regarding 35 U.S.C. 101, claim 24 is non-statutory under the most recent interpretation of the Interim Guidelines regarding 35 U.S.C.101 because this claim is toward a computer program, and as claimed, does not define any structural and functional interrelationship between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized (Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760; Lowry, 32 F.3d at 1583-84, 32 USPQ2d at 1035).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Miyasaka et al (6484142).

As per claims 1,7,11, Miyasaka et al (6484142) teaches:

“determining....group of data” as determining the largest absolute value of the input data (col. 13 lines 45-55);

“identifying, based on the LAV, a difference table.....Huffman codebooks” as selecting the optimal codebook among multiple codebooks (col. 24 lines 58-64);

“calculating one or more indexes....codebooks” as calculating the indices (col. 20 lines 55-65);

“determining a size difference.....table” as calculating values retrieved from the combination table (col. 22 lines 25-37);

“selecting one of the two....value” as choosing the appropriate codebook (col. 20 lines 6-22);

As per claims 2,3,8, Miyasaka et al (6484142) teaches creating a plurality of tables from the Huffman codebooks (col. 22 line 61 – col. 23 line 9).

As per claim 4, Miyasaka et al (6484142) teaches quantized spectral coefficients (col. 10 lines 42-45);

Art Unit: 2626

As per claims 5,6, Miyasaka et al (6484142) teaches a direct correspondence between the LAV and Huffman associated table (col. 14 lines 1-21).

As per claims 9,10, Miyasaka et al (6484142) teaches multiple number of Huffman codebooks, to the Hth codebook (Fig. 2).

Claims 12-24 are computer readable medium, system, encoding, and apparatus claims that are similar in scope and content of claims 1-11; therefore, claims 12-24 are rejected under similar rationale as applied above to claims 1-11.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see related art listed on the PTO-892 form.
